70						IOI's Take Data as of 7 July, 2016
						The organic food industry is growing quickly, but so is the list of competitors
60						in the space. WFM had a competitive advantage in its supply chain
				ereeee		relationships, but that advantage has begun to weaken as larger grocery
50 -						chains have developed their own sourcing relationships and organic farming has become more widespread. WFM is having to spend heavily on new
50 -						stores (incl. "365" discount chains) while sales at existing stores are falling on
						average. Groceries is essentially a business that thrives on scale; WFM was very successful as a niche player, but is having trouble keeping up in the
40	ГОГ	. ¢25 70				battle for scale. New 365 format creates medium-term growth uncertainty.
